RE: MB Docket No. 10-56

Dear Chairman Genachowski and Commissioners:

I am writing to express my confidence in the newly proposed partnership between Comcast and NBC-Universal. As a member of the Florida House of Representatives, I value companies that contribute positively to our state, such as Comcast which has both economically bolstered many areas of the state, and continues to demonstrate support for children and families.

Specifically, Comcast is a powerful economic presence in Jacksonville, employing many residents in its local call center, which I have witnessed firsthand during a tour of the facility. Further, Comcast has created economic opportunities for small business owners as it works to put in place an innovative high speed national broadband network that can advance small business opportunities. Broadband access allows Floridians to connect with the world, which benefits families and businesses, as well as our schools and libraries to whom Comcast provides complimentary service.

A good corporate citizen, Comcast is a valued supporter of many local and national non-profit organizations and also sponsors programs that protect children from online predators and cyber-bullying. Through its well-known Digital Connectors program, Comcast has made helping to bridge the "digital divide" a priority by providing technology-training to teens and young adults who can then share their new skills with others in their communities. I consider Comcast to have its' finger on the

pulse of what it takes to improve the quality of life and advance opportunities in the neighborhoods they serve.

As you consider the proposed transaction with NBC-Universal, please take into account the great work that Comcast has done and continues to do for Floridians.

Sincerely,

A handwritten signature in black ink, appearing to read "Audrey Gibson", with a stylized flourish at the end.

Audrey Gibson  
State Representative
